EDUCATION

Degree/Certificate	School/Institute/Board	CGPA/Percentage	Year
B.Tech. in CSE	Indian Institute Of Information Technology, Nagpur	6.89 / 10 (Till 5th Sem)	2023–Present
Senior Secondary (XII)	Sanskar Public School, Gwalior, CBSE Board	81%	2022
Secondary (X)	St. Paul's School, Gwalior, CBSE Board	88%	2020

PROJECTS

- **Visitor Management System – IIIT Nagpur** Dec 2025 – Feb 2026
React, TypeScript, Supabase (PostgreSQL + Auth + Realtime + RLS), Tailwind CSS [Github](#) | [Live Demo](#)
 - Built a campus visitor management system for IIIT Nagpur that streamlined visitor approval, gate entry, and live status tracking across four user roles – Admin, Host, Guard, and Visitor.
 - Implemented QR code generation on visit approval, delivered to visitors via EmailJS; guards scan it at entry while Supabase Realtime keeps all statuses in sync.
 - Added visitor blacklisting, bulk CSV import, and Google OAuth login, while securing all data access with PostgreSQL Row Level Security.
- **Expense Tracker** Jul 2025 – Sep 2025
React, Node.js, Express.js, MongoDB Atlas, JWT, Cloudinary, Tailwind CSS, Vercel [Github](#) | [Live Demo](#)
 - Built a personal finance app for tracking income, expenses, and budgets, with a dashboard showing spending-vs-budget charts and flexible date-range filtering.
 - Designed auto-resetting budgets (daily, weekly, or monthly) and a one-click export for up to 12 months of transactions as PDF or Excel, with profile photos stored via Cloudinary.
 - Secured the API with JWT, bcrypt, Helmet headers, and per-route rate limiting; deployed on Vercel with MongoDB Atlas as the database.
- **Shortify – URL Shortener** Mar 2026 – Apr 2026
React, Node.js, Express.js, PostgreSQL, Drizzle ORM, JWT, Nodemailer, Tailwind CSS, Docker [Github](#) | [Live Demo](#)
 - Shipped a URL shortener with JWT auth, email OTP verification, and browser fingerprinting so guest users get 3 free shortens per device without signing up.
 - Each link supports password protection, custom expiry (1 hour to 30 days), and a QR code download; an analytics page tracks clicks, device type, OS, and location.
 - Implemented per-route rate limiting to prevent misuse and ran the full stack locally with Docker before deploying to Vercel.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, JavaScript, TypeScript, SQL
- **Frontend:** HTML, CSS, React.js, Tailwind CSS, Zustand, Framer Motion, Context API, Responsive Web Design
- **Backend:** Node.js, Express.js, REST APIs, JWT, OAuth 2.0, bcrypt, Zod, Multer, Rate Limiting
- **Database & ORMs:** PostgreSQL, MySQL, MongoDB, Mongoose, Supabase, Drizzle ORM
- **DevOps & Tools:** Git, GitHub, Docker, Vercel, Postman, VS Code, Vite, Cloudinary
- **Core Subjects:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- **Adobe India Hackathon**
 - Ranked **8th** nationally at the Adobe India Hackathon among all competing teams, finishing in the top 15 out of hundreds of participants across India.
- **Competitive Programming**
 - Achieved a peak contest rating of **1572** on [LeetCode](#) and solved **350+** problems spanning Arrays, Sliding Window, Dynamic Programming, Graphs, and Trees.
- **Full-Stack & Backend Development**
 - Independently built and shipped **3 production-grade full-stack applications** with secure REST APIs, JWT authentication, role-based access control, and third-party integrations like OAuth, Cloudinary, and EmailJS.
- **Deployment & DevOps**
 - Deployed and managed all projects end-to-end using **Vercel, Docker, and cloud databases** (MongoDB Atlas, Supabase, PostgreSQL), with containerized local development and live production environments.
